

# TIGER OF SWEDEN WOMEN'S ACCESSORIES

## SPRING/SUMMER 2018

For Spring/Summer 2018 the Tiger of Sweden Women's accessories put focus on the seasonal colours; The palette is subtle and muted to complement RTW's sharp and cool colours: pairing the grey and cold tones with the signature black and the seasonal muted forest green in both leather and suede, as well as using dusty desert pink tones and crispy light blues.

A new line of bags with soft, round lines made in smooth calfskin is added to the collection for a more relaxed and drapey feeling. The voluminous silhouettes in the womenswear collection are translated into boxy structured leather bags, and the curved lines of the sculptural tailoring are transformed into signature pieces of hardware, like a D-ring with a sculptural expression. The hardware is used as embellishment for the minimalistic bags.

For the footwear collection, soft summer suedes and vacchetta leathers are used to give the shoes a luxurious expression. As a contrast to the leather and suede, traditional tailoring materials appear on a summer sandal in checkered wool and on a pair of slippers in a striped wool.

Both fabrics are taken from the womenswear collection. The slip-ins are key for the season and come in three different variations; a slip-in mule with a marble effect heel, a classic slipper and a pair of slip-in sneakers.
